

Practice Grid

One operation per sheet. Write the operation at the top, then work down. The constraint is the point.

Operation / focus for this sheet

Times-Table Tracker

One row per table, one column per attempt. Tick, do not score. Over weeks the gaps show themselves.

Table	Try 1	Try 2	Try 3	Try 4	Solid?

Working-Out Sheet

Method, not answers. Most wrong maths is right with one slip in the middle, and you cannot find a slip on a page of answers.

Question

Working

Answer

Where it went wrong, if it did
